## Supplement to

M-25  
As Amended  
July 1, 1951

# INFORMATION LETTER

NATIONAL CANNERS ASSOCIATION

No. 1343

Washington, D. C.

June 30, 1951

## TITLE 32A—NATIONAL DEFENSE, APPENDIX

### Chapter VI—National Production Au- thority, Department of Commerce

[NPA Order M-25 as amended July 1, 1951]

#### M-25—CANS

This order as amended is found neces-  
sary and appropriate to promote the  
national defense and is issued pursuant  
to authority granted by section 101 of  
the Defense Production Act of 1950. In  
the formulation of this order and certain  
amendments hereto, including this  
amendment, there has been consulta-  
tion with industry representatives, in-  
cluding trade association representatives,  
and consideration has been given to their  
recommendations. However, consulta-  
tion with representatives of all trades  
and industries affected by the issuance  
of this order as amended has been ren-  
dered impracticable by the fact that the  
amendment to this order affects a very  
substantial number of different trades  
and industries.

This amendment affects NPA Order  
M-25 as follows: It establishes quotas  
and limitations on cans made wholly of  
black plate; it establishes new quotas of  
cans which may be accepted and used by  
packers; it amends certain manufactur-  
ing and delivery preferences for cans  
and establishes certain new preferences;  
it further limits products which may be  
packed in cans by amending Schedule I;  
and it makes provision for the third  
quarter of 1951 and succeeding quarters.  
This order as hereby amended includes  
all provisions affecting cans (as herein  
defined) except Direction 1 to NPA Or-  
der M-25, as amended May 1, 1951.

As so amended NPA Order M-25 reads  
as follows:

#### Sec.

1. What this order does.
2. Definitions.
3. Restrictions on use of cans.
4. Other restrictions.
5. Restrictions on amount of cans that may be accepted.
6. Restrictions on amount of cans that may be used for packing.
7. Standards for adjustments.
8. Manufacturing and delivery preferences.
9. Exceptions.
10. Certification of delivery of cans.
11. Applications for adjustment or exception.
12. Records and reports.
13. Communications.
14. Violations.

**AUTHORITY:** Sections 1 to 14 issued under  
sec. 704, Pub. Law 774, 81st Cong. Interpret  
or apply sec. 101, Pub. Law 774, 81st Cong.;  
sec. 101, E. O. 10161, Sept. 9, 1950, 16 F. R.  
6105; 3 C.F.R. 1950 Supp.; sec. 2, E. O. 10200,  
Jan. 3, 1951, 16 F. R. 61.

**SECTION 1. What this order does.** This  
order places restrictions upon the accept-

ance of, the delivery of, and the uses of  
cans. Schedule I sets out required plate  
specifications which vary according to  
the products packed. NPA Order M-24  
permits the use of tin plate and terne-  
plate for cans in accordance with the  
terms of this order. NPA Order M-8 sets  
forth specifications for solder that may  
be used in the manufacture of cans.

**Sec. 2. Definitions.** As used in this or-  
der:

(a) "Can" means any unused con-  
tainer made in whole or in part of tin  
plate, terneplate, or black plate, which is  
suitable for packing any product. The  
term includes any container which has  
a closure or fitting, made in whole or in  
part of tin plate, terneplate, or black  
plate, but does not include a glass con-  
tainer having such a closure or fitting.  
The term does not include fluid milk  
shipping containers, nor does it include  
crown closures for cone-topped cans.

(b) "Tin plate" means steel sheets  
coated with tin, and includes "primes,"  
"seconds," and all other forms of tin  
plate, except waste and waste-waste.

(c) "Terneplate" means steel sheets  
coated with terne metal, and includes  
"primes" and "seconds." The term does  
not include terneplate, waste-waste, or  
terneplate waste. "Terne metal" means  
the lead-tin alloy used as the coating for  
terneplate, but does not include lead re-  
covered from secondary sources which  
contains less than 1.5 percent residual  
tin.

(d) "SCMT" means special coated  
manufacturers' terneplate.

(e) "Waste" means scrap tin plate and  
terneplate (including strips and circles)  
produced in the ordinary course of man-  
ufacturing cans, and tin plate and terne-  
plate strips produced in the ordinary  
course of manufacturing tin plate and  
terneplate. The term also includes tin  
plate and terneplate parts recovered from  
used cans.

(f) "Waste-waste" means hot-dipped  
or electrolytic tin-coated steel sheets or  
steel sheets coated with terne metal  
which have been rejected during process-  
ing by the producer because of imper-  
fections which disqualify such sheets  
from sale as primes or seconds.

(g) "Black plate" means steel sheets  
(other than tin plate or terneplate)  
29-gage (128 pounds) or lighter. The  
term includes can manufacturing qual-  
ity black plate (CMQ), "black plate re-  
jects," chemically treated black plate  
(CTB), waste-waste, and waste.

(h) "Packer" means any person who  
either (1) purchases empty cans and  
fills such cans in packing any product  
or (2) purchases empty cans and has  
them filled for his account by another  
party, but who controls sale and dis-  
tribution of the finished product after  
packing.

(i) "Person" means any individual,  
corporation, partnership, association, or  
any other organized group of persons,  
and includes any agency of the United  
States or any other government.

**Sec. 3. Restrictions on use of cans.**  
Subject to the exceptions set forth in  
section 9 of this order, no packer shall  
purchase, accept delivery of, or use cans  
for any purpose other than for packing,  
in accordance with the can specifications  
and quota limitations set out in Schedule  
I appearing at the end of this order, a  
product listed in Schedule I.

**Sec. 4. Other restrictions.** No person  
shall manufacture, sell, or deliver cans  
which he knows or has reason to believe  
will be accepted or used in violation of  
the terms of this order or any other  
order or regulation of the National Pro-  
duction Authority (hereinafter called  
"NPA"). No person shall sell or deliver  
cans which he knows or has reason to  
believe will be exported outside of the  
continental limits of the United States,  
its territories and possessions (unless  
such export is to Canada), except as per-  
mitted under paragraph (h) of section 9  
of this order.

**Sec. 5. Restrictions on amount of cans  
that may be accepted.** No person shall  
accept delivery of any cans at a time  
when his inventory thereof exceeds, or  
by acceptance of such delivery would be  
made to exceed, a practicable minimum  
working inventory (as defined in § 10.4 of  
NPA Reg. 1) of cans required by him  
for packing products listed in Schedule  
I of this order in accordance with the  
quota and material limitations set forth  
in Schedule I.

**Sec. 6. Restrictions on amount of cans  
that may be used for packing.** (a) This  
order, by previous amendments, required  
a packer, commencing with the second  
quarter of 1951, to choose as his base  
year either the calendar year 1949 or  
the calendar year 1950. Such require-  
ment continues to apply to all packers.  
Any packer who has so chosen his base  
year for computing his permissible can  
quotas for a calendar quarter, and any  
packer who has not heretofore chosen  
but hereafter chooses a base year for  
such purpose, must predicate all com-  
putations required by paragraph (b) of  
this section, for the third calendar quar-  
ter of 1951 and succeeding quarters, on  
his base year as chosen.

(b) Commencing with the third cal-  
endar quarter of the year 1951 and each  
succeeding calendar quarter thereafter,  
until otherwise ordered by NPA, no  
packer may use cans for packing any  
particular product listed in Schedule I  
of this order in excess of an amount of  
cans determined by applying the per-  
centage listed in Column (3) of Sched-

ule I opposite a particular product to the amount of cans which he used for packing that particular product during the corresponding quarter of his selected base year. "The amount of cans," as the phrase is used in the preceding sentence and elsewhere in this order when applied to the corresponding quarter of his base year, means the total area of tin plate, terneplate, and black plate used in the manufacture of such cans. Where the word "unlimited" appears in Column (3) of Schedule I opposite a particular product, a packer may use the specified cans in an unlimited quantity to pack that particular product, subject to the inventory restriction contained in section 5 of this order. If a packer used less than the limited amount of cans permitted for packing a particular product during the first or second quarters of 1951, he may use the unused amount for packing that particular product at any time during the balance of the calendar year 1951. If a packer uses less than the limited amount of cans permitted for packing a particular product during the third calendar quarter of 1951, he may use the unused amount for packing that particular product during the balance of the calendar year 1951. No packer may assign, transfer, or surrender, to or for the benefit of any other person, his permissible can quota for any calendar quarter or any part or parts of such quota.

(c) In certain instances Column (3) of Schedule I of this order authorizes one quota if a particular product is packed in cans of larger size or sizes and a different quota if such product is packed in cans of smaller size or sizes. In such instances, the packer's base period usage for packing that product in cans of larger size or sizes determines his permitted base for packing such product in such larger size or sizes during the third quarter of 1951 and thereafter, and his base-period usage for packing such product in cans of smaller size or sizes determines his permitted base for packing such product in such smaller size or sizes during the third quarter of 1951 and thereafter. In any such instance, a packer, for packing such product, may increase his permitted base of cans of a larger size or sizes by that area of tin plate, terneplate, and black plate by which he decreases his permitted base of cans of a smaller size or sizes for packing such product, but he may not increase his permitted base of cans of a smaller size or sizes for packing such product by decreasing the area of tin plate, terneplate, and black plate used by him for cans of a larger size or sizes for packing such product.

**Sec. 7. Standards for adjustments.** In any case where the provisions of section 6 of this order may be subject to adjustment because of any of the reasons set forth in Direction 1 to NPA Order M-25, as amended May 1, 1951, or as from time to time hereafter amended, determinations of adjustments may be made by the packer in accordance with the standards and subject to the conditions stated in said Direction 1.

**Sec. 8. Manufacturing and delivery preferences.** (a) So far as practicable, every can manufacturer shall schedule his operations (including his ordering of tin plate, terneplate, and black plate) so as to permit delivery of cans in the quantities and at the times he reasonably anticipates will be required. Where he is unable to schedule all orders for cans for delivery at the times required, he shall schedule his operations and select the orders to be placed in his production schedule according to the following preferences:

(1) All DO rated orders and any other orders under NPA directives;

(2) Requirements for cans to pack products designated with the letter A in column (2) of Schedule I;

(3) Requirements for cans to pack products designated with the letter B in Column (2) of Schedule I.

(b) A can manufacturer must not fill orders for cans with preference B designations if by doing so he will make himself unable to meet deliveries which he reasonably anticipates will be required for cans with preference A designation. If, after filling all reasonably anticipated requirements for cans with preference A designations, a can manufacturer is unable to fill all his requirements for cans with preference B designations, he must equally distribute such shortage against all requirements for cans with preference B designations.

**Sec. 9. Exceptions.** (a) The can material specifications set out in Schedule I of this order do not apply to the use of any cans which were in the inventory of a packer or in the inventory of a can manufacturer or in process of manufacture on January 27, 1951, or to tin plate or terneplate which was either in process at a tin mill, or in the inventory of a tin mill for the account of a can manufacturer, or in the inventory of a can manufacturer on January 27, 1951. It is the intent of this section that any tin plate or terneplate intended for use in the manufacture of cans in inventory or in process on January 27, 1951, as aforesaid, shall be used notwithstanding the can material specifications of this order. However, the restrictions of section 6 of this order are not excepted by this paragraph.

(b) Any person who purchases cans for packing and not for resale and whose total use of cans for packing all products in any calendar year requires less than 250 base boxes of tin plate, terneplate, and black plate shall be exempt from the use limitations of section 6 of this order but not from the can material specifications of Schedule I. This exemption does not apply to any person who buys empty cans or parts thereof and sells such cans or parts thereof to a packer.

(c) The use limitations of section 6 of this order and the can material specifications in Schedule I do not apply to cans used to pack any product in home canning, community canning, or institutional (meaning such institutions as prisons, reform schools, and insane asylums) canning where the product is not to be sold. This exemption also applies

to cans for packing laboratory samples and control samples, but not to cans for packing samples distributed for the purpose of advertising or for promoting the sale of a product, nor to any cans used for packing products which are later repacked and sold.

(d) Orders having a DO rating are exempt from the restrictions in sections 5 and 6 of this order on the amount of cans that may be accepted and used.

(e) The use of cans for packing any product which is required to be packed in cans, set aside and reserved for purchase by any authorized Government agency is exempt from the use limitations of this order, but not from the can material specifications in Schedule I: *Provided, however,* That if the can material specifications of Schedule I require that any product be packed in cans made in whole or in part of 0.25 tin plate, any No. 10 cans and any part or parts thereof, used for packing any such product or products which are so reserved and set aside, may be made of 0.50 tin plate.

(f) The can material specifications set out in Schedule I of this order shall not apply to orders having a DO rating requiring the packing of products in accordance with Military Specifications of the Department of Defense for use outside the 48 States of the United States and the District of Columbia by the Armed Forces of the United States, including the United States Coast Guard. The can material specifications set out in Schedule I shall apply, however, to all other orders having a DO rating.

(g) The restrictions of this order shall not apply to military requirements for cans of a special design or style not normally produced or used commercially, nor to cans for emergency rations and supplies for lifeboats.

(h) The provisions of this order shall not apply to the sale or delivery of cans where the person selling or delivering the same has received a validated export license therefor from the Office of International Trade, or has received from another person a certificate signed manually. This certificate shall be by letter in substantially the following form, the inapplicable words stricken therefrom, and shall be filed with each purchase order with the person selling or delivering to such other person cans for export:

To:..... Seller:

The undersigned purchaser certifies, subject to criminal penalties for misrepresentation, that (he has received a certification from another person that) the Office of International Trade has issued to (him) (such other person) validated export license No. .... for export shipment of all of the items included in the attached purchase order, and that all purchases from you of items included in the said purchase order and the acceptance of the same will be in compliance with the said validated export license.

In cases of export to those countries where the Office of International Trade does not require an export license, no certificate shall be required until such time as an export license is required by the Office of International Trade.

**Sec. 10. Certification of delivery of cans.** No manufacturer, jobber, or dis-

tributor shall sell or deliver cans unless he has received from the purchaser a certificate signed manually. This certificate shall be by letter in substantially the following form and, once filed by a purchaser with a manufacturer, jobber, or distributor, covers all future deliveries of cans from the manufacturer, jobber, or distributor to that purchaser:

To \_\_\_\_\_, manufacturer, jobber, or distributor:

The undersigned purchaser certifies, subject to criminal penalties for misrepresentation, that he is familiar with Order M-25 of the National Production Authority, and that all purchases from you of items regulated by that order, and the acceptance and use of the same by the undersigned, will be in compliance with said order, and any amendments thereto.

**Sec. 11. Applications for adjustment or exception.** Any person affected by any provision of this order may file a request for adjustment or exception upon the ground that his business operation was commenced during or after the base period, that any provision otherwise works an undue or exceptional hardship upon him not suffered generally by others in the same trade or industry, or that its enforcement against him would not be in the interest of the national defense or in the public interest. In examining requests for adjustment claiming that the public interest is prejudiced by the application of any provision of this order, consideration will be given to the requirements of the public health and safety, civilian defense, and dislocation

of labor and resulting unemployment that would impair the defense program. Each request shall be in writing, submitted on Form NPAF-38 in triplicate, and shall set forth all pertinent facts and the nature of the relief sought, and shall state the justification therefor. Form NPAF-38 must be executed as therein required.

**Sec. 12. Records and reports.** (a) Each person participating in any transaction covered by this order shall retain in his possession for at least 2 years records of receipts, deliveries, inventories, and use, in sufficient detail to permit an audit that determines for each transaction that the provisions of this order have been met. This does not specify any particular accounting method and does not require alteration of the system of records customarily maintained, provided such records supply an adequate basis for audit. Records may be retained in the form of microfilm or other photographic copies instead of the originals.

(b) All records required by this order shall be made available at the usual place of business where maintained for inspection and audit by duly authorized representatives of NPA.

(c) Persons subject to this order shall make such records and submit such reports to NPA as it shall require, subject to the terms of the Federal Reports Act of 1942 (5 U. S. C. 139-139F).

**Sec. 13. Communications.** All communications concerning this order shall be

addressed to the National Production Authority, Containers and Packaging Division, Washington 25, D. C., Ref: M-25.

**Sec. 14. Violations.** Any person who willfully violates any provision of this order or any other order or regulation of NPA or who willfully conceals a material fact or furnishes false information in the course of operation under this order is guilty of a crime and, upon conviction, may be punished by fine or imprisonment or both. In addition, administrative action may be taken against any such person to suspend his privilege of making or receiving further deliveries of materials or using facilities under priority or allocation control and to deprive him of further priorities assistance.

**NOTE:** All reporting and record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Schedule I is hereto attached and made a part of this order.

This order as amended shall take effect on July 1, 1951.

NATIONAL PRODUCTION  
AUTHORITY.

MANLY FLEISCHMANN,  
Administrator.

**SCHEDULE I—CAN SPECIFICATIONS**

Columns 4 and 5 specify the weight of tin-coating per base box of tin plate and ternplate which may be used for the parts of cans for the products listed in Column (1). Any packer may also use for packing a listed product black plate cans or cans with a tin-coating lighter than that specified for that product. Wherever 0.25 pound electrolytic tin plate is specified, SCMT may be used. Tin plate menders arising in the production of electrolytic tin plate may be used only where hot-dipped tin plate is permitted in this schedule. When only a figure is given in Columns (4) and (5), this means that tin plate may be used for the part, and the figure given indicates the maximum weight of tin-coating on each base box of plate. Electrolytic 0.25 pound tin plate may be used in place of black plate in that part of a can which, after filling, is required to be hermetically closed by soldering, or that part of a can to which a nozzle is required to be attached by soldering; *Provided*, however, that the total area of 0.25 pound electrolytic tin plate used in such parts is limited to not more than the total area of plate used in such parts for packing a particular product during the corresponding period of 1940 or 1930.
